ADVANCES IN CIVIL ENGINEERING
18th– 23rd December 2017
INFORMATION BROCHURE**

Organized by

Department of Civil Engineering

***Dr. Babasaheb Ambedkar College of
Engineering and Research***

Hingna Road, Wanadongri, Nagpur-441 110

ABOUT THE INSTITUTE

The **Dr. Babasaheb Ambedkar College of Engineering & Research** was established in the year 2008. It is run by **Meghe Group Of Institutions, Nagpur** and is affiliated to *Rashtrasant Tukdoji Maharaj Nagpur University, Nagpur*. The Institute is located in a sprawling lush green campus. The Institute offers Four UG courses in Engineering & Technology. The Institute has excellent infrastructural facilities, well-equipped laboratories, central and departmental libraries and highly qualified and well-experienced faculty members. The institute is Affiliated B+ by NAAC.

ABOUT THE STTP

The STTP intended to assist the students, researchers and professionals mainly from academic institutions, field engineers, scientific organizations, roads and building works departments, PWD, consultancy agencies, constructing companies, water resources and irrigation departments, groundwater and public health departments and other agencies to share their knowledge and to develop mutual training and research activities. This STTP provides the theoretical information and practical hands-on training on recent advances in Civil Engineering with an emphasis on the emerging

trends in the major field specializations such as: Geotechnical Engineering, Structural Engineering, Integrated Water Resources and Environmental Management and Transportation Engineering. The recent advances in experimental and computational methods in the various areas of Civil Engineering are going to be addressed comprehensively by the eminent experts in this STTP.

Objectives of the STTP: The STTP will focus on fundamental principles that underlie current and anticipated developments and research scope in Civil Engineering. The objectives of the workshop are to:

- Document current development in the field and capture visions for future research
- Identify gaps and needs, as well as applications that hold the greatest potential for impact

Outcomes of the STTP: The participants will learn the basics of the following technical areas:

- Soil dynamics and earthquake engineering
- Earth and water retaining structures
- Advances in concrete technology
- Geosynthetics
- Several Case studies
- Advances in Transportation Engineering
- Water Gem
- Bridge Engineering

EXPERTS

Experts from NIT's ,IIT's and Reputed speakers from industries etc. will be invited as speakers.
